

# Alaska EMT – I Vocabulary List

February, 2005

|   |                       |
|---|-----------------------|
| activated charcoal                                    | lacrimation           |
| adequate  | nasopharyngeal        |
| agitated  | neurogenic            |
| agonal respirations                                   | normothermic          |
| alveoli   | obligation            |
| analgesic   | oropharyngeal         |
| anaphylaxis   | oscillation           |
| anatomical  | oxygenated            |
| angina  | oxygenation           |
| angulated   | palpation             |
| apnea   | pericardial tamponade |
| auscultation  | phantom pain          |
| authorization   | pulmonary             |
| avulsion  | pupillary             |
| bradycardia   | referred pain         |
| bronchioles   | retractions           |
| cannula   | sepsis                |
| capillaries   | supplemental          |
| cardiopulmonary                                       | tachycardia           |
| carina  | tachypnea             |
| composition   | vasodilation          |
| constriction  | ventilated            |
| crepitus  | ventilating           |
| cyanosis  |                       |
| defibrillation  |                       |
| deoxygenated  |                       |
| diaphoretic   |                       |
| dislodged   |                       |
| distal  |                       |
| distended   |                       |
| distension  |                       |
| emphysema   |                       |
| end-organ perfusion                                   |                       |
| fibrinolytics   |                       |
| flail chest   |                       |
| flow-restricted, oxygen-powered<br>ventilation device |                       |
| hyperglycemia   |                       |
| hyperventilation                                      |                       |
| hypotension   |                       |
| hypothermic   |                       |
| hypovolemia   |                       |
| impaired  |                       |
| inadequate  |                       |
| Kussmaul respirations                                 |                       |
